**Description:** THIS RESOURCE IS NO LONGER IN SERVCE, documented January 25, 2019. Core brings together leading technologies for sample preparation, protein separations, identification and characterization. Through collaboration with the Computational Research Support Unit, Biosciences and Proteomics Technologies is developing new systems for electronic laboratory information management and bioinformatics. The research facility offers services and training in proteomics discovery technologies to Australian and international researchers from academia and industry. Core has expertise in experimental design, custom method development, sample preparation, complex mixture fractionation and protein separations. Sydney Biosciences and Proteomics Technologies also manages the core infrastructure and operations for the Faculty of Science's extensive Biomedical and Bioscience research facilities.

Abbreviations: UTS Biosciences and Proteomics Technologies

Synonyms: University of Technology Sydney Biosciences and Proteomics Technologies
