**Proper Citation:** WUSTL Histology Core (RRID:SCR\_012700)

**Description:** The Histology Core has all the requisite equipment and reagents to enable a variety of tissue processing, embedding and sectioning protocols, including epon/araldite, glycol and methyl methacrylate, polyethylene glycol (PEG), paraffin and cryosectioning. Users of the Histology Core can choose to submit full service jobs and allow core personnel to embed, section and counterstain fixed tissue samples or they can sign up to use a microtome and cut the tissue themselves. Training on any aspect of the histologic process is available on request. All core services are equally available to core members and non-members on a first-come first-served basis.
