Proper Citation: BrainBox (RRID:SCR_014750)

Description: Web application which allows users to visualise and collaboratively segment and annotate any brain MRI dataset available online via URL. A list of brains are available for use on the main site. Segmentations are automatically saved and can be downloaded as Nifti files or triangular meshes. Users can point BrainBox to their own Nifti data, or try data catalogues created by the community.

Resource Type: software application, software resource

Keywords: web application, data visualization software, mri, dataset, visualization, segment, nifti, collaboration

Availability: Public
