Proper Citation: Sutter P-97/PC Pipette Puller (RRID:SCR_018636)

Description: Pipette puller that fabricates pipettes for use in intracellular recording, patch clamping, transferring ICSI, ES Cells, microinjection, aspiration, and microperfusion. P-97 puller can indirectly sense viscosity of glass, giving the ability to pull pipettes from all glasses except quartz. Even difficult to pull formulations, such as aluminosilicate glasses, are handled with relative ease.
