Description: EpiSonic Multi-Functional Bioprocessor 1100 system is a multi-sample sonication instrument of the latest generation for use in a wide range of biological applications, in particular for DNA and chromatin shearing. This completely digital instrument allows for simultaneous optimized processing of 1 to 12 samples by tube, best for NGS applications, and can be easily integrated into existing lab workflows. Chiller is included at no additional charge. The EpiSonic 1100 sonicator was designed and built with the processing of biological samples specifically in mind, particularly NGS applications via Illumina or Ion Torrent workflows.
