Proper Citation: University of Pennsylvania Perelman School of Medicine Center for Biomedical Image Computing and Analytics Core Facility (RRID:SCR_022397)

Description: Offers development and application of advanced computational and analytical techniques that quantify morphology and function from biomedical images, as well as on relating imaging phenotypes to genetic and molecular characterizations, and on integrating this information into diagnostic and predictive tools in era of personalized medicine. Computational methods can contribute significantly to automated, reproducible and quantitative interpretations of biomedical images. Translates advanced computational and analytical imaging methods to clinic, by providing forum in which interactions between researchers and clinicians facilitate bidirectional flow of ideas, algorithms and data between laboratory and clinic.
