Description: Provides range of evaluation and data services to support client needs. Through consulting, evaluation, methodology, and training, we work to fill gaps and improve and empower data driven decision making. At the proposal stage of grants, we can design evaluation plans to meet your project needs, with the associated narrative text, budget, and letter of collaboration, as needed. We can also fill gaps post-award, or provide support with internal funding. We can assist with logic models, Broader Impacts, methodologies, needs assessments, survey design and implementation, support with Institutional Review Board applications, and trainings in our areas of expertise.
