Description: paired box 6 promoter driving a Gal4-GFP fusion sequence. Green fluorescence in the developing eye and nervous system. When crossed with UAS lines, will activate the reporter/effector gene in cells that normally express pax6.

Species: *Xenopus laevis*

Notes: paired box 6 promoter driving a Gal4-GFP fusion sequence. Green fluorescence in the developing eye and nervous system. When crossed with UAS lines, will activate the reporter/effector gene in cells that normally express pax6.

Phenotype: Green fluorescence in the developing eye and nervous system. When crossed with UAS lines, will activate the reporter/effector gene in cells that normally express pax6.
