Description: Rattus norvegicus with name LAA/FDSC from RGD.

Species: Rattus norvegicus

Notes: In 1985 two lines of Sprague-Dawley were selectively bred for their active shuttle-box avoidance task which is a device used for evaluating the effects of chemicals in pharmacological and toxicological studies and testing learning behavior of animals. These animals have a lower rate of avoidance response and showed little interindividual variation. [National BioResource Project for the Rat in Japan](#)
