### Organism Information

**URL:** <http://www.wormbase.org/db/get?name=WBStrain00038605>

**Proper Citation:** RRID:WB-STRAIN:WBStrain00038605

**Description:** Caenorhabditis elegans with name Whole-genome sequenced strain. from WB.

**Species:** Caenorhabditis elegans

**Synonyms:** Whole-genome sequenced strain.

**Notes:** Made\_by: Vancouver KO Group|"Million Mutation Project strain. This strain was isolated after EMS mutagenesis of VC2010, propagated clonally through F10 to drive mutations to homozygosity, and subjected to whole-genome sequencing. It is homozygous for a large number of mutations determined from sequence data. It may also carry large copy number variations that are not homozygous. Alleles numbered between gk100000 and gk962522 are homozygous; those numbered from gk962523 up should be assumed to be non-homozygous. A graphical representation of these large copy number differences can be seen in the Plot section for each strain on the MMP web site ( URL: [genome.sfu.ca/mmp/](http://genome.sfu.ca/mmp/)).|"This strain was provided by the C. elegans Reverse Genetics Core Facility at the University of British Columbia, which is part of the international C. elegans Gene Knockout Consortium, which should be acknowledged in any publications resulting from its use."

**Catalog Number:** WB-STRAIN:WBStrain00038605

**Database:** WormBase (WB)

**Database Abbreviation:** WB

**Availability:** available

**Source References:** [PMID:31300558](#)

**Alternate IDs:** WB-STRAIN:VC20674, CGC\_VC20674

**Organism Name:** VC20674

**Record Creation Time:** 20230227T013710+0000

**Record Last Update:** 20260905T115415+0000
