Proper Citation: RRID:WB-STRAIN:WBStrain00041074

Description: Escherichia coli with name E. coli. from WB.

Species: Escherichia coli

Synonyms: E. coli.

Notes: Bacteria. E. coli HT115(DE3) bacterial strain carrying pGC8. pGC8 is a partial cDNA of him-14 (ZK1127.11) cloned into the Timmons and Fire double T-7 vector L4440. The source of the cDNA is Yuji Kohara's clone yk240h12. pGC8 was constructed by inserting the 1.65kb KpnI/SacI fragment of the him-14 cDNA (from base pair 1071 to 192 base pairs beyond the stop codon) into the same sites in L4440. HT115(DE3) carrying pGC8 should be selected in the presence of 50 um/ml tetracycline and 100 um/ml ampicillin. Prior to an actual feeding experiment, it can be grown in liquid in the presence of amp alone (no tet) and then seeded onto NGM plates containing amp and 1 mM IPTG. This technique does not work well if the cells are old; therefore, the strain should be seeded onto IPTG-containing plates from a fresh overnight that was grown from a colony on an amp/tet plate. Biosafety Level: BSL-1. For more info see URL: www.wormbook.org/wli/wbg17.1p32/"Made_by: Killian/Hubbard"|"Non-elegans Strain"

Catalog Number: WB-STRAIN:WBStrain00041074

Database: WormBase (WB)

Database Abbreviation: WB

Availability: available

Alternate IDs: WB-STRAIN:GC363, CGC_GC363

Organism Name: GC363

Record Creation Time: 20230227T013729+0000

Record Last Update: 20260815T163431+0000

Ratings and Alerts

No rating or validation information has been found for GC363.

No alerts have been found for GC363.
